DIRECTOR OF CENTRAL INTELLIGENCE
Committee on Imagery Requirements and Exploitation
Washington, DC 20505

23 July 1985

MEMORANDUM FOR: Deputy Director, Intelligence Community Staff

SUBJECT: Permanent Cadre Authorization [   ]   25X1

    1. The Operations Division of COMIREX has a longstanding vacancy for a requirements analyst in the Standing Requirements Branch. The position has been vacant for six months despite efforts to fill it with a rotational assignee from the Intelligence Community.   We have advertised the position Community-wide and have attracted only one applicant. His experience level was so limited in this area that he was not accepted. [   ]   25X1

    2. The position requires an individual with a strong base of imagery tasking experience. The incumbent will be primarily responsible for the management of imagery collection and exploitation requirements for current systems. In addition, he will participate in the development and management of requirements for future systems. [   ]   25X1

    3. [   ] of the National Imagery Interpretation   25X1
Center, has expressed a strong interest in the position as a permanent cadre assignment. [   ] has a number of years of experience in imagery   25X1
collection and exploitation requirements management. He has served as NPIC's primary and alternate representative to the Standing Requirements Working Group. His capabilities are well known within the Operations Division and it is felt that he could fill the vacant position admirably. I request your concurrence in offering [   ] a permanent cadre position in the Operations   25X1
Division, Standing Requirements Branch. [   ]   25X1

    25X1

[   ]
Chairman
